

Release Note

D365 Data Archiver | 8.2.0.0

Release Date: 04 April 2024

Release Note: D365 Data Archiver | 8.2.0.0

1. Introduction

The document communicates bug fixes added in this release of D365 Data Archiver.

2. About this Release

This release includes bug fixes and functional enhancements.

3. Bug Fixes

This release contains the below fix

A. Problem Statement:

DDA Main control having pagination inconsistency while user search for email on main control.

Solution: We have pinpointed the problem and successfully fixed the pagination glitch. Now, regardless of any page the user searches for an email, the pagination will consistently function as intended.

4. Features/functionality

NA

5. Deployment Steps

To deploy the DDA on desired environment please refer to our **Installation manual** which includes these steps:

- 1) Pre-requisites for the target environment
- 2) Run the Pre-deployment utility application.
- 3) Run the package deployer application
- 4) Manual step for updating Environment Variables
- 5) Run the Setup utility application

NOTE: All the deployment steps need to be performed by the System Administrator.
